Subscribe at

www.MyStockProspector.com.

5

3 Step Process of Screening

6

Advanced Tip #1

- } Create search with basic criteria & customize Report with fields you always like to see.
 - Use fields in PERT Report or Stock Comparison Guide.
- } View Results & save that Report.
 - Use description to identify as "report template."
 - Appears in My Saved Screens.
- } Start new search by opening screen and edit Selected Criteria.

7

Advanced Tip #2

- } Use R² (R-squared) to search for companies with *consistent* growth.
- } R² varies from 0.0 to 1.0.
 - The closer the R² is to 1.0, the straighter the line.
- } Available in Quality group for Revs & EPS for multiple year periods.

8

Advanced Tip #3

- } Compare any criteria to its Industry Average.
- } Use where numbers vary greatly by industry:
 - % Pre-Tax Income
 - Debt-to-Equity.
- } Right click in minimum criteria box to pop up "Ind Avg – Current Field" option.

9

Advanced Tip #4

- } Limit companies with stable or growing PTI % in SSG Section 2.
- } Add Trend PTI criteria from Quality group.
- } Click buttons to highlight acceptable values.
 - ++ is best.
 - -- is worst.

10

Advanced Tip #5

- } Add ticker symbols of current holdings or watch list to any screen.
- } Select Symbol from Other group.
 - Start typing ticker, program will auto-complete.
 - Use semi-colon to separate tickers.
- } Use Parentheses around all *other* criteria, then select OR condition before symbol.

OR Symbol a PBR.A, CMG, BJRI, BMLD
BMLD

11

Save Your Screen

- } Select Current Screen to save for future use.
- } If revising previously-created screen, change Name and Description to add new Saved Screen.
- } My Saved Screens always use current data to determine companies displayed.

Current Screen
Screen Name 15% growing companies
Description large-cap. high growth Save
